## SUMMARY

Product-minded full-stack software engineer with experience researching, designing, and building software products end-to-end. I value code quality, clean design, and creating polished, intentional products. Comfortable leading by example, I thrive on teams that encourage creativity and technical excellence.

## WORK EXPERIENCE

### Molten Cloud

Sept 2020 - Present

*Software Engineer → Senior SWE → Lead Frontend Engineer*

*Remote*

- Built a full-stack revenue data ingestion pipeline with fuzzy matching; critical to acquiring top customers and scaling client demand.
- Led the Javascript framework migration from Vue 2 to Vue 3, resolving outdated dependencies and training teammates to continue the work while keeping production stable.
- Directed front-end infrastructure improvements and standardized UI components to boost code quality, maintainability, and visual consistency.
- Collaborated with executives and contractors to design and manage product features, acting in the roles of UI Designer and Product Manager when needed.

### Fulbright U.S. Student Program

Mar 2022 - Dec 2022

*Open Research Award*

*São Paulo, Brazil*

- Conducted applied ML research evaluating generative image models across languages (English vs Portuguese). Published in the [NeurIPS Creativity Workshop \(2022\)](#).

### MIT CSAIL

May 2019 – Jan 2020

*Undergraduate Research Assistant*

*Cambridge, MA*

- Calibrated 3D-printing systems and designed an algorithm to convert bitmaps into optimized G-code instructions, balancing speed and drying time to improve printed varnish distribution.

## EDUCATION

### Massachusetts Institute of Technology

June 2020

*S.B. Computer Science & Engineering; S.B. Brain & Cognitive Sciences*

*Cambridge, MA*

- Board member of dormitory non-profit (<https://www.seniorhousecorp.org/>)
- Lead organizer of 400+ person alumni event from Jan 2018 to May 2018

## SKILLS & INTERESTS

- **Technologies:** Python, Java, JS/TS, HTML/CSS, Vue, React, Ant-D, Bootstrap, TailwindCSS, FastAPI, MongoDB, Pydantic, TensorFlow, NumPy, Pandas, Figma, Github, JIRA, Sempahore CI/CD, Kubernetes, AWS, Cursor
- **Skills:** Project planning, UI/UX design, Data modeling, User research, Cross-functional collaboration, mentoring/junior dev support, scaling systems
- **Interests:** Painting, photography, travel, linguistics
- **Languages spoken:** English (Native), Portuguese (Fluent), Spanish (Intermediate)

## PUBLICATIONS & CONTRIBUTIONS

- **Not All Artists Speak English: Generating Images with DALL-E 2 from Portuguese:** NeurIPS Creativity Workshop 2022. [https://neuripscreativityworkshop.github.io/2022/papers/ml4cd2022\\_paper15.pdf](https://neuripscreativityworkshop.github.io/2022/papers/ml4cd2022_paper15.pdf)
- **Acknowledged contributor on Spatially Varying Gloss:** SIGGRAPH Asia 2020 <https://cdfig.mit.edu/assets/files/SpatiallyVaryingGloss.pdf>
