## SUMMARY

Product-minded full-stack software engineer with experience researching, designing, and building software products end-to-end. I value code quality, clean design, and creating polished, intentional products. Comfortable leading by example, I thrive on teams that encourage creativity and technical excellence.

## WORK EXPERIENCE

### Molten Cloud

Sept 2020 - Dec 2025

Cloud platform for managing media content, rights, royalties, and global distribution

Remote

Software Engineer → Senior SWE → Lead Frontend Engineer

- Designed and built a full-stack data ingestion and processing pipeline for media revenue and contract data, enabling accurate royalty calculations and onboarding of enterprise film/TV clients.
- Modeled complex domain entities across content, contracts, and revenue flows, supporting scalable ingestion, querying, and reporting workflows across internal and customer-facing systems.
- Designed and implemented REST APIs to support ingestion, transformation, and querying of inconsistent, real-world datasets across contracts and revenue systems.
- Led migration of a production application from Vue 2 to Vue 3, resolving critical dependency issues and improving system reliability while maintaining uninterrupted service.
- Drove frontend architecture improvements and standardized component systems, increasing development velocity and maintainability across a growing codebase.
- Partnered with executives and cross-functional stakeholders to define product requirements in ambiguous problem spaces, translating business needs into technical solutions and leading execution end-to-end.

### Fulbright U.S. Student Program

Mar 2022 - Dec 2022

Open Research Award

São Paulo, Brazil

- Conducted applied ML research evaluating generative image models across languages (English vs Portuguese). Published in the [NeurIPS Creativity Workshop \(2022\)](#).

## EDUCATION

### Massachusetts Institute of Technology

June 2020

S.B. Computer Science & Engineering; S.B. Brain & Cognitive Sciences

Cambridge, MA

- Board member of dormitory non-profit (<https://www.seniorhousecorp.org/>)
- Lead organizer of 400+ person alumni event from Jan 2018 to May 2018

## SKILLS & INTERESTS

- **Technologies:** Python, Java, Typescript, HTML/CSS, Vue, React, TailwindCSS, FastAPI, MongoDB, Pydantic, Figma, Github, JIRA, Sempahore CI/CD, Kubernetes, AWS, Cursor
- **Skills:** Project planning, full-stack system design, UI/UX design, data modeling, user research, cross-functional collaboration, mentoring/junior dev support, scaling systems
- **Interests:** Painting, photography, travel, linguistics
- **Languages spoken:** English (Native), Portuguese (Fluent), Spanish (Intermediate)

## PUBLICATIONS & CONTRIBUTIONS

- **Not All Artists Speak English: Generating Images with DALL-E 2 from Portuguese:** NeurIPS Creativity Workshop 2022. [https://neuripscreativityworkshop.github.io/2022/papers/ml4cd2022\\_paper15.pdf](https://neuripscreativityworkshop.github.io/2022/papers/ml4cd2022_paper15.pdf)
- **Acknowledged contributor on Spatially Varying Gloss:** SIGGRAPH Asia 2020 <https://cdfg.mit.edu/assets/files/SpatiallyVaryingGloss.pdf>
